# ABSTRACT

Rainfall during the 1971-72 water year was below average for the third consecutive year. The ground water situation in the Central Basin was again diminished through the decrease in natural replenishment of the Basin at Whittier Narrows, which was the lowest amount spread in the past six years. Rainfall is also reflected in the amount of ground water extracted and in the amount of water imported, in that it increased the amounts needed to meet all water requirements during the 1971-72 water year.

Sixty-nine parties overextracted a total of 4,035.58 acre-feet in the 1971-72 water year. Forty-five of these parties overextracted by less than the 10 percent or 2 acre-feet limit established by the Judgment. Of the remaining twenty-four parties, twenty two have purchased sufficient water from the 1972-73 Central Basin Exchange Pool, or have initiated steps to eliminate their overextractions, and two are in violation of the Judgment.

During the 1971-72 water year, the watermaster processed over 179 water right sale and lease agreements. The sale of water rights reduced the number of parties under watermaster by 36. Several parties were warned about violations of the Judgment.

Item	Water Year	
	1970-71	1971-72
Parties	363	327
Active pumps	299	269
Active nonparties	25	20
Allowed Pumping Allocation, in acre-feet	217,367	217,367
Watermaster expenses	\$ 73,462.05	\$ 58,288.52
Watermaster expenses, per acre-foot pumped	\$ .35	\$ .27
Rainfall, in inches	11.51	6.51
Injection at barrier, in acre-feet	4,132	4,994
Spreading operation, in acre-feet	127,265 <sup>a/</sup>	70,811
Extractions, in acre-feet	211,443	215,943
Imports, in acre-feet	150,794 <sup>a/</sup>	156,619
Exports, in acre-feet	-35,822	-35,400
TOTAL WATER USE, in acre-feet	366,372 <sup>a/</sup>	377,162

## FOREWORD

The Department of Water Resources, as Watermaster for the Central Basin, submits this annual report as a comprehensive review of water supply conditions in the Basin during the 1971-72 water year. The report was prepared for the Superior Court in the County of Los Angeles, and for the parties to the Central Basin Judgment, whose provisions authorize its publication.

The Central Basin is administered by the Department as a watermaster service area in accordance with Part 4, Division 2, of the California Water Code. The basin has been operating for several years under a well-defined management plan that limits and monitors ground water extractions.

This report contains information on ground water extractions, use of imported water, recharge operations, the administration of the Exchange Water Pool, and a financial report on watermaster service during the 1971-72 water year.

Figure 1. CENTRAL BASIN

## I. THE CENTRAL BASIN

The Central Basin is a relatively large ground water basin underlying the southeastern part of the Los Angeles Coastal Plain. The basin is bounded on the south and west by the Newport-Inglewood Uplift, and on the north by the hills between the Coastal Plain and the San Gabriel Valley, and on the east by the Orange County line. A general outline of the basin is shown in Figure 1.

Most of the 227 square-mile basin supports an urban-suburban culture, there being 23 incorporated cities within the basin. A substantial portion of the water needed by the cities is pumped directly from the underlying basin.

Some twenty years ago an overdraft of the ground water basin resulted in declining water levels which triggered sea water intrusion and threatened the ground water supply. Timely legal action halted the overdraft and prevented serious damage to the basin. Today, ground water use in the Central Basin is restricted by a Superior Court Judgment and monitored by a court-appointed Watermaster. The Watermaster's prime duty is to administer the controls prescribed by the Judgment and to report annually to the Court and parties on significant ground-water-related events that occur in the Basin. The Basin has been operated under the management of a Watermaster for six years.

### History of Water Resources Development

One hundred years ago, the Los Angeles Coastal Plain was poised on the threshold of a development boom. The key to the future of the Central Basin was water.

The definite shortage of adequate year-round surface water supplies in the Central Basin forced the early development of ground water sources. As early as 1870, water users had tapped the artesian wells and springs east of the Newport-Inglewood Uplift. When the artesian wells ceased to flow, water users were forced to drill small wells for reliable water supplies. These small wells easily supplied enough water to continue the economic growth of the Central Basin Area.

Ground water development spurred dramatically ahead in 1909 with the advent of the deep well turbine pump. Tremendous adaptability and superior operating characteristics of the new pump placed efficient water wells within economic reach of everyone. Reliable water supplies attracted industry and agriculture. Each new business required water. Eventually, the demand for ground water exceeded the natural replenishment of the Central Basin.

The resulting overdraft was clearly indicated by dropping ground water levels and a few small areas of sea water intrusion. The rapidly increasing cost of pumping ground water and an occasional well failure because of dropping water levels were the chief economic reasons for the keen interest in the Central Basin's serious ground water problem.

The deteriorating ground water situation in the Central Basin and the adjoining West Coast Basin prompted interested water users to form the Central Basin Water Association in 1950. A plan to manage the Central Basin's resources began to materialize. The plan would:

1. Provide a supplemental water supply to major producers.
2. Limit ground water extractions from the Central Basin.
3. Create an exchange water pool to provide ground water pumping rights for water users without access to other supplemental water supplies.

Phase I was realized in 1952 when the Central Basin Municipal Water District was formed to distribute water from the Colorado River. The District was annexed to The Metropolitan Water District of Southern California in 1954, and Colorado River water soon was flowing into the Central Basin.

The West Basin Water Association and the Central Basin Water Association were largely responsible for the creation of the Central and West Basin Water Replenishment District in 1959. This special District covers 420 square miles of the Central and West Coast Basins (Coastal Plain) of Los Angeles County. The District's objective is to replenish and maintain the ground water basins by purchasing imported water to recharge the Basin and halt sea water intrusion. The District financed this program during the 1971-72 water year by placing a tax of \$6 during the first nine months and \$9 the last three months on each acre-foot of ground water extracted within the District's boundaries.

On January 2, 1962, the Central and West Basin Water Replenishment District filed Case No. 786,656 in the Superior Court, County of Los Angeles, naming more than seven hundred parties. The Plaintiff's objectives: quiet title to rights to the use of ground water; and regulate withdrawals from the Central Basin to protect the water supply from deterioration.

Adverse ground water conditions, and the indefinite period before a final adjudication could be expected, prompted the Central Basin Water Association to draft an interim agreement curtailing extractions from the basin. By September 1962, a proposed interim agreement had been approved by a sufficient number of water producers (producers owning over 75 percent of the Assumed Relative Rights within the basin) to guarantee control over ground water pumping in the basin. On September 28, 1962, the Court signed the "Order Pursuant to Stipulation and Interim Agreement and Petition for Order" and appointed the Department of Water Resources as Watermaster.

In order to avoid the protracted litigation experienced in other watermaster service areas in Los Angeles County, the attorneys representing principal parties held monthly meetings to work toward settlement of the action. A stipulated judgment was drafted by the attorneys at these meetings. Signatures of approval obtained from public utility water companies and other producers represented well over 200,000 acre-feet (75 percent) of the total rights within the basin. This was a prerequisite to filing the stipulated judgment with the Court.

A pretrial was held in March, and on May 17, 1965, the case went to trial before the Honorable Edmund M. Moor. After a week's testimony on engineering, geology, hydrology, safe yield of the basin, and arguments on water right entitlements, the case was continued to August 25, 1965. Shortly thereafter, Judge Moor appointed the California State Department of Water Resources, Watermaster. The final Judgment was signed on October 11, 1965, and became effective on October 1, 1966.

## Watermaster Service

Watermaster Service is administered by the California Department of Water Resources in accordance with Part 4, Division 2, of the California Water Code. Watermaster Service Areas are created by the Department either at the request of water users or by order of the Superior Court. The first Watermaster Service Area was formed in September 1929. Currently, there are 19 such areas controlling the surface water diversions in Northern California and 4 in Southern California controlling ground water extractions.

Once a month, every ground water pumper reports his ground water extractions to the Watermaster. This makes possible updating of his water right account (Watermaster Production Summary) by computing the amount pumped during the previous month, the total amount pumped during the current water year, and the amount that can legally be pumped during the remainder of the year. A copy of the Watermaster Water Production Summary is mailed to the pumper each month.

If electric meter readings are reported along with water meter readings, electric power consumption can be correlated with water production. Erratic or rapidly increasing electric consumption vs. water production, for instance, may suggest an inefficient pump, system losses, or an inaccurate water meter. In this manner the summary occasionally indicates malfunction of pumps or water meters.

The Watermaster field staff calibrates the water meter on every active water well at least once every two years. Accurate measurement of ground water extractions is absolutely necessary to the success of the Basin's management plan. All available means, including system efficiency tests, are

used to confirm water meter test results. One copy of each test is furnished to the well owner and inaccurate meters must be repaired within thirty days. Follow-up tests on repaired meters and initial tests on new wells are scheduled whenever necessary. Parties may also request a meter test at any time.

During the 1971-72 water year, the Watermaster evaluated historical ground water production records of several parties. All of the reviews were routine and resulted in minor uncontested changes in the record.

## Central and West Basin Water Replenishment District

The Central and West Basin Water Replenishment District (C&WBWRD) is a very active water conservation organization in Los Angeles County. The District is responsible for replenishing the underground water supply of both Central and West Coast Basins.

The creation of water replenishment districts is a statutory procedure established by the California Legislature. Division 18 of the California Water Code describes the duties and obligations of a water replenishment district. Such districts have powers very well suited to solving ground water problems whether the problem be quality or quantity oriented.

The Central and West Basin Water Replenishment District is comprised of a Board of Directors and a small staff to carry out the directives of the Board. The District is actively engaged in several replenishment programs. These programs (i.e., water spreading, barrier operation, and in lieu replenishment) are described in this report. The District also

publishes an annual report of its yearly operations during February or March of each year. Additional information about the District can be obtained from its staff at 7439 East Florence Avenue, Downey, California 90240, phone: 773 5790.

The Watermaster cooperates very closely with the Central and West Basin Water Replenishment District for many reasons: (1) Watermaster Service areas in Central and West Coast Basins closely coincide with the District boundaries; (2) both the District and the Watermaster

are required to record all ground water extractions from the basins; (3) the District was the Plaintiff in the Central Basin Water Rights Case, (Case No. 786,656, Superior Court, Los Angeles County); (4) both the District and the Watermaster are concerned with the usefulness of the ground water basins on the Coastal Plain.

Many of the Watermaster's data collection programs are coordinated with the District to prevent duplication. Hence, your monthly or quarterly water well report is mailed to the District and forwarded by the District to the Watermaster.

## II. WATER SUPPLY CONDITIONS

Water from many sources is required to serve the needs of Southern California's thriving urban economy. Water from the Colorado River and Owens River, State Project water, runoff from the mountains, ground water, reclaimed waste water, and desalination plants along the coast contribute to one of the largest water supply systems in the world. State Project water became available to the area during the past year.

### Precipitation

Southern California enjoys a Mediterranean-type climate characterized by hot dry summers and sparse precipitation during the winter months. The average rainfall on the Central Basin

during 1971-72 was 6.51 inches (46 percent of normal). This is the third successive year that the annual rainfall was less than normal. The mean seasonal precipitation (base period 1897-1947) varies from 12 inches at Long Beach to 16 inches at Whittier Narrows. The locations of the precipitation stations, used to measure rainfall, and the annual amount recorded are shown on Figure 2.

Local precipitation in the basin does not influence the ground water supply of the Central Basin to any great degree. A layer of impermeable material lies between the surface and the producing aquifers except in the forebay areas. As a consequence, very little of the annual

Figure 2. PRECIPITATION STATIONS

rainfall reaches the zones from where it can be pumped back to the surface. The below normal rainfall (about 38 percent of normal) in the nearby San Gabriel Mountains did not induce much runoff which could subsequently be captured at the Whittier Narrows to the benefit of the Central Basin.

### Ground Water Recharge

Natural replenishment of the basin's ground water supply is limited to inflow through Whittier Narrows (and some underflow) from the San Gabriel Valley. Some of the water that percolates into the forebay areas of Central Basin eventually crosses the Central-West Coast Basin barrier and into the West Coast Basin. For several years now, outflow and extractions have exceeded natural replenishment, thus upsetting the basin's balance.

Today, attempts are being made to re-establish nature's balance. One method of artificial replenishment is water spreading. Water is flooded on areas where it can percolate into the underground aquifers and supplement the natural recharge supply. Large quantities of water can be returned to the ground by spreading water, but the process is limited by the space available for spreading facilities and the ability of the recharge aquifers to transmit water back to the basin.

The small quantities of runoff during 1971-72 again resulted in a poor year of record for the conservation of local runoff. Storm runoff conserved was 53 percent of the storm runoff conserved the year before while the purchased water spread was 57 percent of the amount purchased and spread that year. The total amount of supplemental water purchased was 1.6 times the local runoff.

The Los Angeles County Flood Control District (LACFCD) operates spreading grounds along the Rio Hondo and San Gabriel Rivers in the Montebello forebay of the Central Basin; see Plate 1 on page 15. The entire spreading operation is summarized in Table 1.

TABLE 1. SPREADING OPERATIONS<sup>a/</sup>

Water Source	Quantity, in acre-feet	
	1970-71 Water Year	1971-72 Water Year
Metropolitan Water District water purchased with Central and West Basin Water Replenish- ment District funds	20,846 <sup>b/</sup>	29,490
MWD water purchased with LACFCD Zone 1 funds	42,167 <sup>b/</sup>	0
Local runoff	44,757 <sup>b/</sup>	23,770 <sup>c/</sup>
Reclaimed water	19,495	17,543
Makeup water from Upper San Gabriel Basin	0	0
TOTALS	127,265 <sup>b/</sup>	70,813

a/ Information provided by the LACFCD as to amount actually spread in Montebello Forebay Area.

b/ Corrected figure.

c/ Includes rising water.

### Alamitos Barrier Project

The Alamitos Barrier Project designed to prevent sea-water intrusion into the fresh aquifers of the Central Basin is of great importance to water users in the Central Basin.

Sea-water intrusion at the mouth of the San Gabriel River (Alamitos Gap) poses a serious threat to the ground water supply. This area has seven water-bearing zones identified in downward order as the Recent aquifer, C-Zone, B-Zone, A-Zone, I-Zone, Main (Silverado) aquifer and Lower Zone (Sunnyside) aquifer.

Sea-water intrusion occurs through the Recent Zone, which is very permeable and open to the sea. The C, B, A, and I Zones merge with the Recent Zone and are therefore susceptible to intrusion, which is notable by the varying degrees of salinity occurring in water found in each zone. The saline water intrusion was detected as far as 10,000 feet landward of the Newport-Inglewood fault zone, and if unchecked, could extend into the Silverado and Sunnyside aquifers which are the principal ground water producing zones in the basin.

The Los Angeles County Flood Control District successfully operates a combination saline water extraction trough and fresh water pressure ridge to halt intrusion. In addition to the extraction wells and injection wells required, a number of observation wells are also part of the project. These provided geological data along the barrier, and are currently being used to monitor ground water levels and water quality in this area. The information from this monitoring program will be utilized in determining if additional barrier facilities are necessary. Since operations of the barrier began in 1965, the sea-water intrusion problem has been effectively contained. The location of the barrier is shown on Plate 1, page 15. Table 2 shows the scope of the project.

TABLE 2. BARRIER OPERATIONS<sup>a/</sup>

Altimas Gap Operation	Quantity
Quantity injected, in acre-feet	4,990 <sup>b/</sup>
Quantity extracted, in acre-feet	1,321
Average injection rate, cubic feet/second	7.1
Average extraction rate, cubic feet/second	2.0
Number of extraction wells	4
Number of injection wells	18
Number of observation wells	202
Wells to be added during 1972-73	
Injection	0
Extraction	1
Observation	0

<sup>a/</sup> Furnished by LACFCD.

<sup>b/</sup> Orange County Flood Control District participated in 23.26% of the cost of injected water during the 1971-72 water year.

## Water Quality

The battle for good quality water in the Central Basin began many years ago. In fact, it was essentially a water quality problem that prompted the Central Basin litigation. Many of the aquifers underlying the Los Angeles Coastal Plain are separated from each other by impervious material. However, some of the aquifers are hydraulically connected to the ocean, so occasionally one or more adjacent aquifers may become impaired by sea water. If a well is drilled downward through two aquifers, one clean, one polluted, without using proper casing techniques, water can move from the polluted aquifer to the unpolluted one.

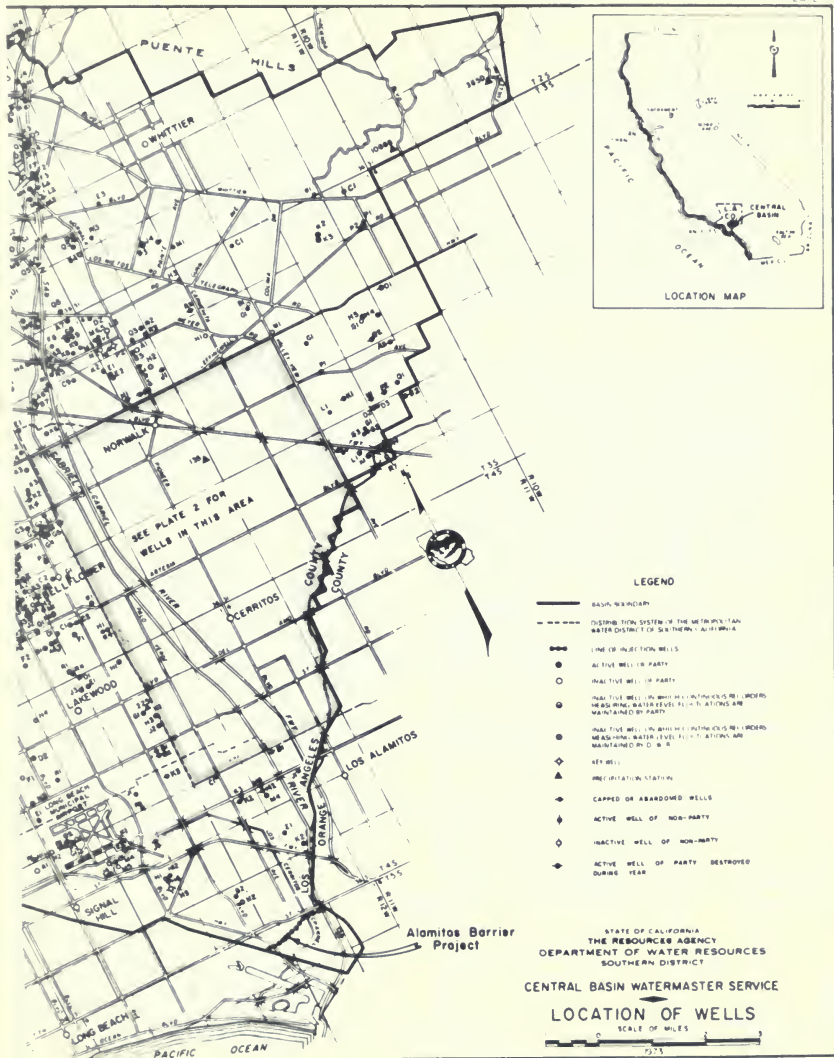

To prevent such occurrences, the Department of Water Resources conducted an intensive investigation that culminated in the publication of recommended standards for water well construction and destruction.<sup>1/</sup> Adoption hearings on these standards were held in 1969 by the Los Angeles Regional Water Quality Control Board and it now reports that all local agencies and municipalities in the Central Basin have adopted them.

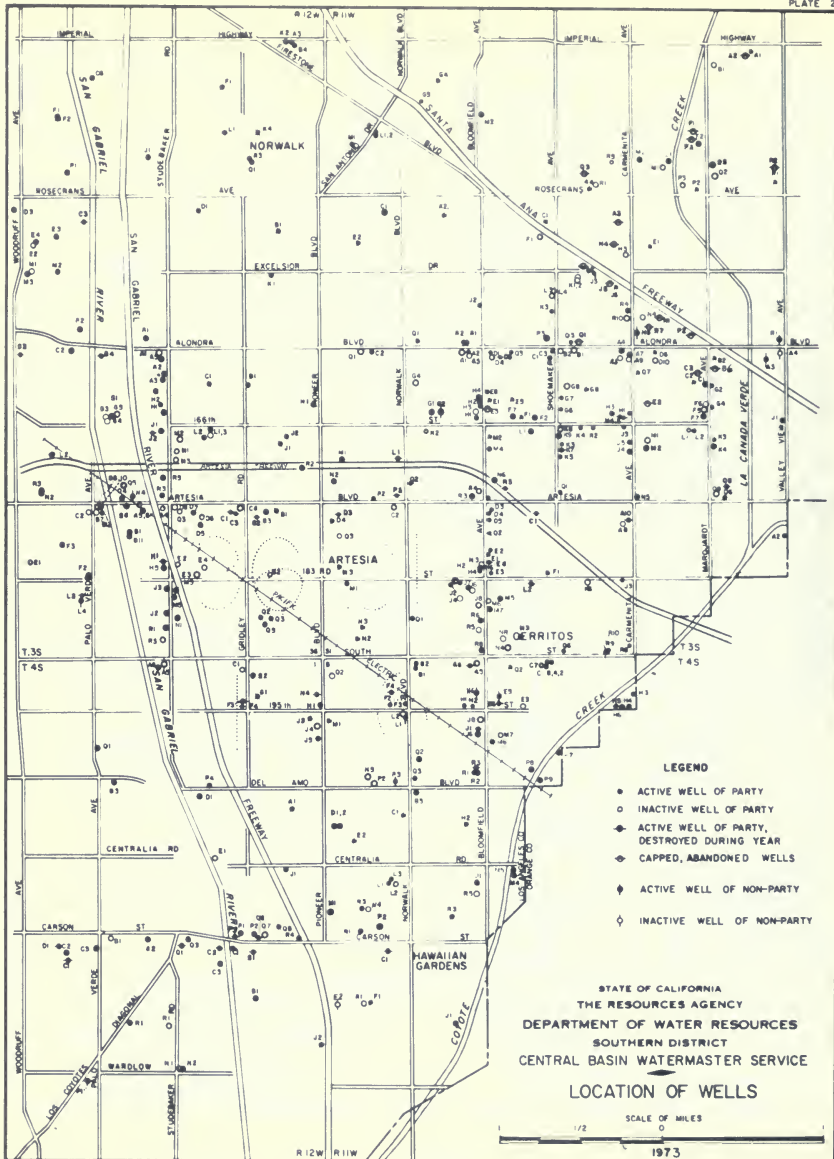

One of the most important pieces of legislation enacted by the 1969 Legislature was the Porter-Cologne Water Quality Control Act (Water Code, Division 7, commencing with Section 13000), effective January 1, 1970. This Act made extensive revisions in California's water quality control laws and is one of the most stringent in the nation.

<sup>1/</sup> DWR Bulletin No. 74, "Water Well Standards; State of California, February 1968; and DWR Bulletin No. 74-4, "Water Well Standards - Central, Hollywood, Santa Monica Basins, Los Angeles County," August 1968.

The regional boards can now enforce discharge requirements without showing the existence of conditions of pollution or nuisance. If a discharger violates requirements of the Boards, and no action is taken to correct deficiencies in discharge, the Board may request enforcement by the Attorney General. Violations of a regional board cease and desist order could result in a maximum fine of \$6,000 for each day of violation.

Solid waste disposal has become a major problem in Southern California during the past 25 years. Today, the average Californian is generating five pounds of solid waste every day of the year which must be disposed of somewhere. Suitable dumpsites are becoming more difficult to find -- particularly in urban areas. In recent years, tremendous pressure to use abandoned gravel pits for dumpsites has materialized.

Fortunately for water users, there is an intense, well-organized campaign against such practices throughout the Los Angeles area. The Central and West Basin Water Replenishment District, Central Basin Water Association and various other agencies have vigorously opposed all applications for permission to operate sanitary landfill programs in the Central Basin. Opposition to the use of gravel pits as dumpsites will undoubtedly continue until fool-proof sealing methods are developed to prevent pollution of ground water by leachates.

A report published by the State of California, Department of Public Health, Bureau of Sanitary Engineering, entitled "Investigation of Ground Water Quality Problems in the Central Basin of Los Angeles County - July 1968" discusses many of the ground water quality problems that may already, or will in the future, face water users in the Central Basin.

## In Lieu Replenishment

Seven years ago, during the 1965-66 water year, the Central and West Basin Water Replenishment District began a program of in lieu replenishment. The program is authorized by Section 60230 of the California Water Code. In effect, the Replenishment District was given the power to contract with any producer having access to supplemental water to have the producer use supplemental water instead of pumping water from the ground.

The program may be used to: alter pumping patterns within a ground water basin; replenish areas of low transmissibility where conventional recharge techniques are ineffective; heighten the effect of injecting water to form a sea-water barrier by reducing extractions in the vicinity; reduce the amount of replenishment water purchased by the District; and reduce the annual ground water extraction from a ground water basin.

When the District first announced its intention to begin the in lieu replenishment program, several Central Basin producers expressed an interest. However, the only producer to actually participate in the program has been the California Water Service Company in the West Coast Basin. The results of the program are summarized in Table 3.

TABLE 3. IN LIEU REPLENISHMENT PROGRAM<sup>a/</sup>

Water Year	Amount contracted in acre-feet	Contract price, dollars per acre-foot	Total Payment
1965-66	744.59	\$ 12.33	\$ 9,180.79
1966-67	850.57	14.14	12,027.06
1967-68	850.00	13.36	11,356.00
1968-69	850.00	14.25	12,112.50

1970-71	881.30	17.83	15,713.58
1971-72	755.55	20.01	15,118.56

<sup>a/</sup> Information provided by the Central and West Basin Water Replenishment District.

The in lieu replenishment program which, if expanded, could obtain significant beneficial results. The Central and West Basin Water Replenishment District is a source of additional information.

#### Construction Projects Affecting Water Supply

Three major projects have significantly affected the water supply of the Central Basin: The State Water Project, the Metropolitan Water District's distribution system, and the second barrel of the Owens River-Mono Basin Aqueduct of the City of Los Angeles.

About 99.8 percent of the State Water Project conveyance facilities are complete. The Metropolitan Water District has completed construction of the Second Lower Feeder between Alameda Street, easterly of the City of Carson, and the Sepulveda Feeder.

Water from Castaic Reservoir of the State Water Project can now be supplied to the Central Basin via the Sepulveda Feeder and Second Lower Feeder, which traverses the basin in an easterly direction. Delivery of filtered State Project water into the Central Basin is scheduled for December 1, 1972.

The City of Los Angeles has completed the construction of the second barrel of its Owens River-Mono Basin Aqueduct. The second barrel actually terminates in the San Fernando Valley but some of the Owens River water eventually crosses the Santa Monica

Mountains and moves southward into the Central Basin.

One other project of considerable interest to Central Basin water users is the Los Angeles County Joint Sanitation District's plan to reclaim waste water. Considerable benefits from spreading reclaimed water in the forebay areas of Central Basin may eventually materialize. Reclaimed waste water from the Whittier Treatment plant is spread in the recharge basins, and on or about November 15, 1972, reclaimed waste water from the San Jose Treatment plant will also be spread in the Montebello forebay area.

#### Ground Water Levels

Every water well owner in the Central Basin is concerned with the location of the ground water level since the cost of pumping water is largely dependent on the distance the water must be lifted.

Figure 3 shows water level information in the form of selected hydrographs. Location of these key wells are shown on Plate 1, page 15. These particular hydrographs are representative of the several aquifers underlying the basin. In general, they show that the water surface has stabilized and, in some cases, risen slightly because of recharge operations and changing extraction patterns.

Additional water level information is contained in the annual report published by the Central and West Basin Water Replenishment District.

WATER LEVEL ELEVATION IN FEET - MEAS. FROM SEA LEVEL

Figure 3. FLUCTUATION OF WATER LEVEL ELEVATIONS  
IN PRINCIPAL AQUIFERS

### III. WATER USE

During the 1971-72 water year, water purveyors in the Central Basin served more than 377,000 acre-feet of water to their customers. The basin contained 1,418 wells-- 797 active-- 401 inactive--18 injection and 202 observation. Four were drilled and 91 were destroyed. (See Appendix C.) The water service areas of the parties in the Basin are shown on Plates 3, 4, and 5, pages 22-27.

A rapid population increase in the Central Basin area has caused the water demand to increase substantially each year. Prior to 1961, ground water from the Central Basin served most of the demand. However, the Judgment reduced extractions to 217,367 acre-feet annually, so imported water rapidly became an important component of the area's water supply.

Figure 4 illustrates the ground water extractions and imported water use from 1952 to the present, less San Gabriel Valley imports. Much of the imported water demand during the past seven years may be attributed to the curtailment of ground water extractions.

Figure 5 provides another graphical analysis of the monthly relationship between rainfall, ground water extractions, and imported supplies. Note how climatic conditions affect the water demand.

A numbering system designated as a State Well Number is assigned to all water wells for identification in the basin. This system is explained in Figure 6.

#### Ground Water Extractions

The Central Basin Judgment limits the amount of ground water each party can extract annually (October 1 through September 30 of each year) from the Basin. This limit is referred to as the "Allowed Pumping Allocation" (APA).

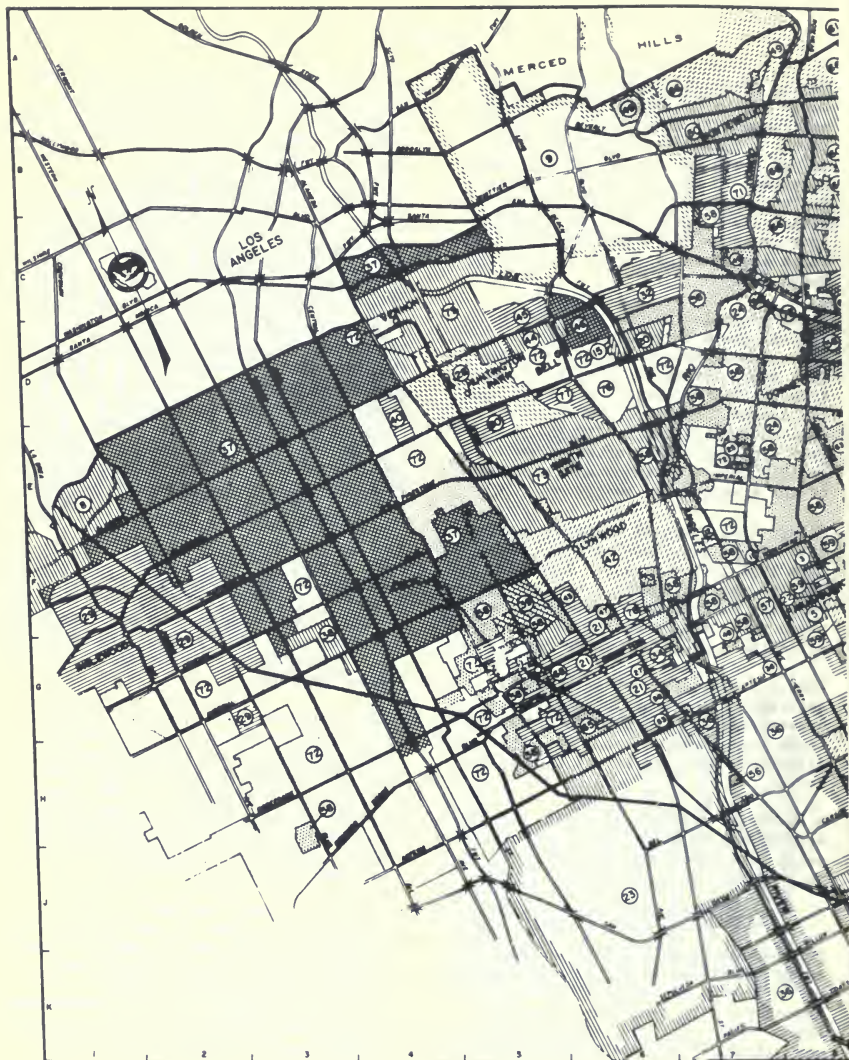

Recipients of exchange pool water may pump the amount released to them in addition to their APA. Table 4, page 28, is a balance sheet summarizing each party's "water account".

The metered ground water production from each active well in the basin is listed by party in Appendix B, Tables B-1 and B-2. Table B-1 lists parties that report on a monthly basis; Table B-2 lists parties that report on a quarterly basis. Normally, water wells producing more than 25 acre-feet per year must be equipped with a water meter and be reported monthly. Wells producing less than 25 acre-feet per year do not necessarily require a meter and may be reported on a quarterly basis. The location of the wells where ground water was extracted is shown on Plates 1 and 2, pages 14-16.

In order to provide flexibility in the control of ground water extractions, the Judgment contains provisions allowing the parties to carry over into the succeeding water year a portion of their unused water right and in some cases to overextract. This flexibility was necessary to meet unforeseen emergencies in water demands.

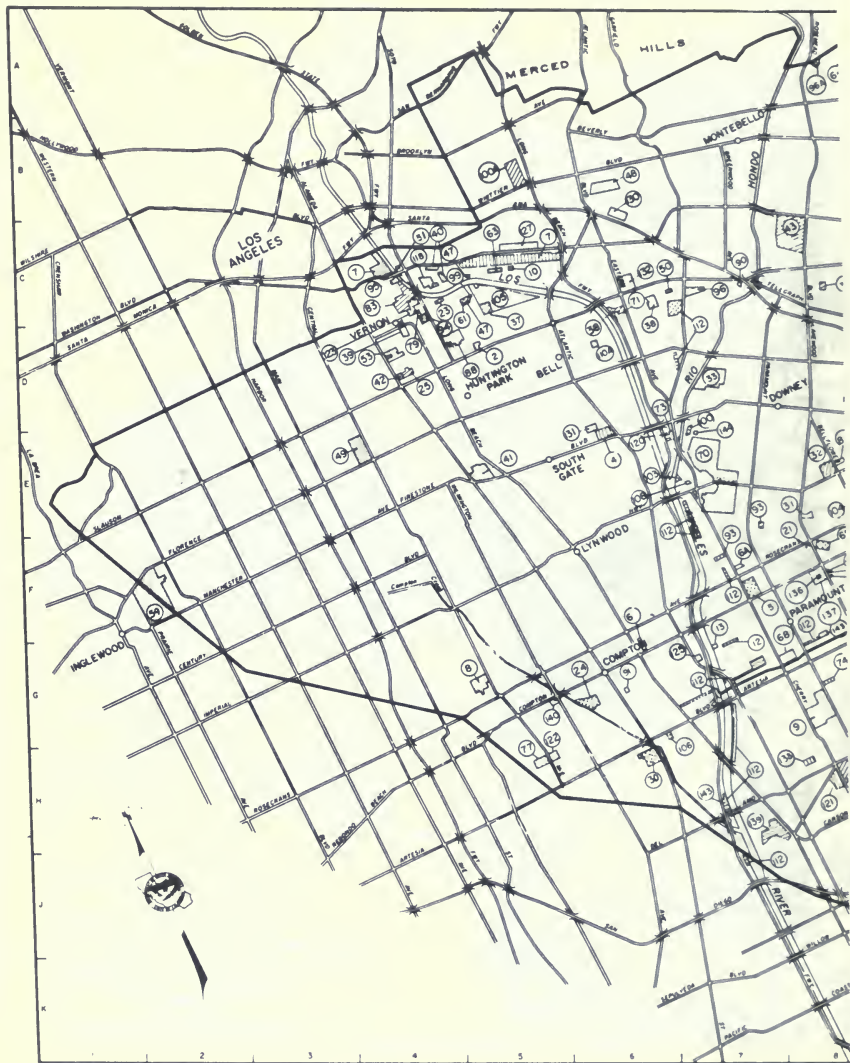

One provision allows parties to carry over from one water year to another any unused APA not to exceed ten percent of their APA or 10.00 acre-feet, which ever is greater. In addition, any unused exchange pool water can be carried over into the following water year. Chapter 4 contains additional information on this provision.

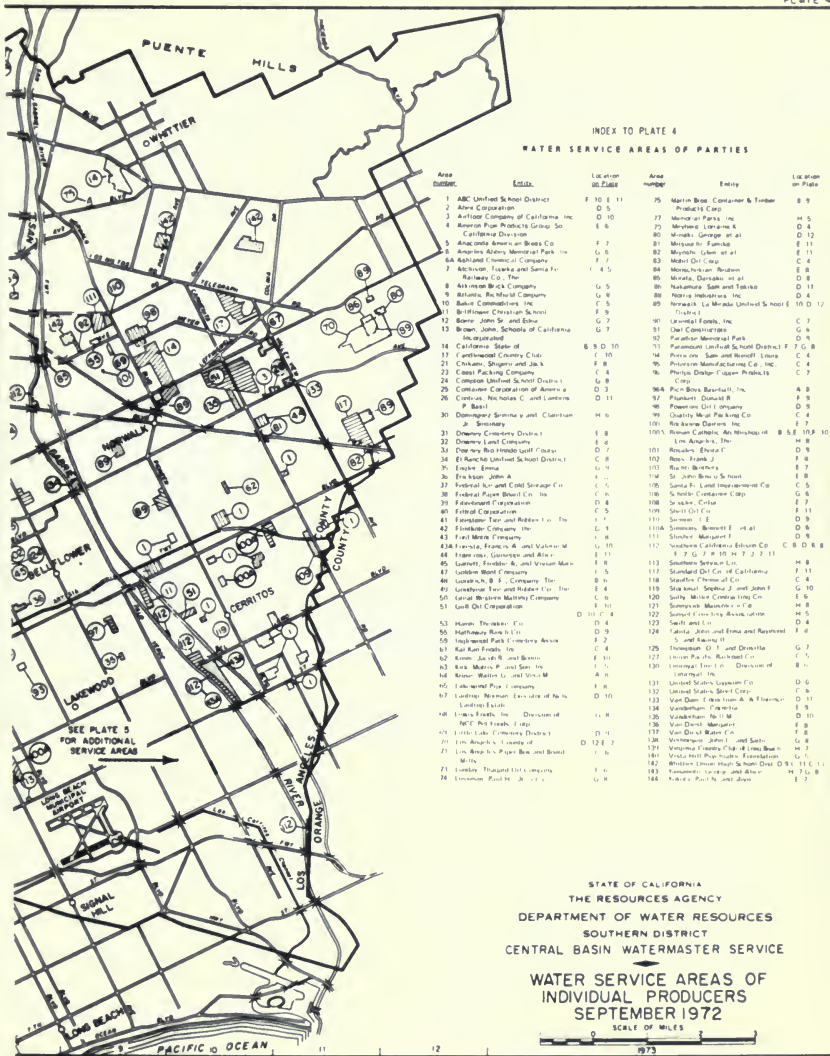

Parties are also allowed to overextract by 10 percent of their APA or 2 acre-feet, which ever is larger. Under certain circumstances, parties may overextract in greater amounts. However, prior approval of the Watermaster must be obtained and in any case, must be made up the following water year.

<sup>a</sup>See Appendix A and Table 10 for information concerning leases, revised water entitlements, or prior ownership.

<sup>b</sup>Includes allowable carryover of predecessors is interest.

<sup>c</sup>Includes extractions by predecessors in interest.

<sup>d</sup>Includes Exchange Pool water carryover.

<sup>e</sup>Computed under old procedure.

<sup>f</sup>Exchange Pool water purchased or sold by predecessors is interest.

<sup>g</sup>Production reported monthly as well as quarterly in Appendix J. See Tables B-1 and B-2.

<sup>h</sup>Includes the Deane Jones (tenant) carryover.

<sup>i</sup>Ann De Cordova will used by Ann De Cordova, Southern California Edison Company, and Standard Brands Paint Company, Inc.

<sup>j</sup>Includes 63.07 acre-feet extracted by State from Well No. 7 or 8 in the State of Art property. State is a tenant there.

<sup>k</sup>Includes extractions from Lakewood Golf Course will by Los Angeles County Parks and Recreation Department. Exchange Pool water is

purchased to offset the extractions at Lakewood Golf Course will.

<sup>l</sup>Los Angeles County has an inter-agency water right exchange whereby all water right balances are combined and divided between the

agencies in proportion to their needs or water right.

<sup>m</sup>Ray Mitchell is a company and a tenant of Charles E. Adams, Corporation of the Presiding Bishop of the Church of Jesus Christ of Latter Day

Saints, and City of Cerritos properties.

<sup>n</sup>Includes 7.00 acre-feet leases entered into by predecessor in interest.

<sup>o</sup>Frank J. Ross and John Tait, et al., share same well on a fifty-fifty basis. F. J. Ross reports all extractions.

<sup>p</sup>Includes 63.07 acre-feet as Postnote E.

<sup>q</sup>Includes extractions by Southern California Edison Substations.

## Extractions by Nonparties

In order to keep the parties and the Court apprised of all ground water extractions within the Central Basin, the Watermaster collected information on nonparty ground water extractions shown in Table 5. The nonparties were not named in the Central Basin Judgment and as such are not under the jurisdiction of the Watermaster. During the 1971-72 water year four nonparties, previously reporting extractions, discontinued pumping from the Central Basin.

## Imported and Exported Supplies

Large quantities of water are imported to the Central Basin from other sources. Water from the Colorado River arrives through the facilities of The Metropolitan Water District of Southern California for distribution

**TABLE 5. NONPARTY GROUND WATER  
EXTRACTIONS - 1971-72**

<b>TOTAL</b>		<b>108.63</b>

State well numbers that identify each water well in the Central Basin are derived from a system based on the U. S. Public Land Survey. Each number consists of township and range designation, a section number, a letter representing the 40-acre tract in which the well is situated, a sequence number indicating the chronological order in which the well number was assigned, and a letter

representing the base and meridian. The last letter is frequently omitted from well numbers in a single area because all wells there share a single base and meridian. Well numbers are assigned by the Watermaster.

The components of well No. 38/11W-12C03S, for example, are identified in the following breakdown:

Township
Range
Section
Tract
Sequence number
Base and meridian

38
11W
12
C
03
S

The derivation of the components is illustrated below:

\* Delivered for use in the Los Alamitos Gap barrier.

by the Cities of Long Beach, Los Angeles, Compton, the West Basin Municipal Water District, and the Central Basin Municipal Water District. The City of Los Angeles also imports water from the Owens River-Mono Basin in east Central California. In addition, the City of Inglewood imports ground water from the West Coast Basin and California Domestic Water Company, San Gabriel Valley Water Company, Suburban Water Company, and the City

of Whittier import ground water from the San Gabriel Basin. Exports from the Central Basin are very small when compared to imports. The City of Long Beach exports blended ground water and Colorado River water to the West Coast Basin, while the California-American Water Company, Dominguez Water Company, and the City of Signal Hill export ground water to the West Coast Basin. Imports and exports are listed in Table 6.

# IV. ADMINISTRATION OF THE JUDGMENT

The Central Basin Judgment was a logical step toward preserving the usefulness of a valuable natural resource. It provides a flexible tool to limit extractions and still allow beneficial use of the ground water supply. However, restriction on extractions imposed by the Judgment forces the parties to look for other supplies. Fortunately, these are available. If they were not, the rapidly increasing demand for water might literally bankrupt the basin before other basin management techniques could be developed.

## Exchange Pool

The Court and parties foresaw that adjudicating the water rights in the Central Basin and limiting the total extraction would not suffice all parties. For this reason, Part III, Subpart C of the Judgment authorizes an Exchange Pool to provide additional water rights for parties without a supplementary supply. Tables 7 and 8 summarize the 1971-72 Exchange Pool transactions.

Membership in the Exchange Pool is voluntary, and any party may join by filing with the Watermaster and the Court a "Notice of Intention to be Bound by the Exchange Pool". This notice is also contained on the Exchange Pool Offer or Request form.

On or about September 30 of each year, the Watermaster mails an Exchange Pool form to each party, requesting that the form be completed and returned to the Watermaster by November 10. The form provides for making: mandatory offers of water rights to the pool, referred to as "Required Offers" in the Judgment; voluntary offers; and request for water rights from the pool. In completing the form, the member must estimate his water needs and supply for the ensuing water year.

A "Required Offer" must be made to the pool when a member has a connection to supplementary water and can obtain imported water from the Metropolitan Water District or the Central and West Basin Municipal Water Districts. The "Required Offer" is limited to 20 percent of the member's Allowed Pumping Allocation; except that the "Required Offer" plus the party's water needs for the year cannot exceed the party's total supply.

A "Voluntary Offer" may be made by any member of the Exchange Pool. The only requirement: the member's supply must exceed his estimated needs and only the difference may be offered. However, the Watermaster must first allocate all the "Required Offers" before using the "Voluntary Offers" in filling Category "A" Requests.

A Category "A" Request is defined as that quantity requested by a member which quantity is not in excess of 150 percent of its Allowed Pumping Allocation or 100 acre-foot, whichever is greater. Category "B" Requests are those requests which exceed the 150 percent or 100 acre-foot limitation. Whenever there are insufficient "Required Offers" to meet all Category "A" Requests, "Voluntary Offers" may be used in lieu of "Required Offers". Category "B" Requests are filled exclusively by Voluntary Offers.

Experience has been such that there have always been sufficient "Required Offers" to meet all the Category "A" Requests; as a result, no "Voluntary Offers" have been used to fill Category "A" Requests. It is doubtful whether "Voluntary Offers" will ever be used to meet Category "A" Requests. Consequently, very few "Voluntary Offers" are used in the Central Basin Exchange Pool. The only instances where "Voluntary Offers" are utilized are in those cases where requests exceed the 150 percent or 100 acre-foot limitation.

During the 1971-72 water year, there were three members to the Exchange pool whose requests met these criteria.

A "Request" for Exchange Pool water right may be made when a member's estimated needs exceed his total supply, including leases.

The price charged for Exchange Pool water rights is fixed by Part III, Subpart C, Paragraph 10 of the Judgment. The price is based primarily on the cost of water from the Central Basin Municipal Water District (CBMWD) and the pumping tax set by the Central and West Basin Water Replenishment District. Since these prices vary from year to year, the cost of Exchange Pool water will likewise vary from year to year. The cost computation for the 1971-72 Exchange Pool is:

(1) Cost of CBMWD water	\$58
(2) Plus	<u>2</u>
	\$60

Less:

(3) Average cost of pumping	\$ 7
(4) Replenishment assessment	<u>6</u>
	<u>-\$13</u>
Price per acre-foot for subscriptions utilized	\$47

Payments for Exchange Pool water rights are made in four equal monthly payments. The first payment is due to the Watermaster on or before December 31, and the remaining three payments on or before the last day of the next three succeeding months. After all payments are received for each month, the Watermaster then disburses the corresponding amount to the parties whose offers were sold.

#### Exchange Pool Carryover

The Central Basin Exchange Pool provides additional pumping rights to parties at a relatively high price. The authors of the Judgment therefore

believed that the parties should be allowed to pump their entire exchange water right purchases regardless of the provisions limiting carryover of water rights. Therefore, a specific exchange water carryover provision was drafted and included in the Judgment.

The clause specifically allows a party that purchased exchange water to carry over the unpumped portion of its allowable extraction until all of the exchange water is pumped. Table 9 lists each party that carried exchange water into the 1971-72 water year, the amount of water carried forward, and the additional costs. The charge is authorized by the Judgment and is based on the difference in the prices of exchange pool water between the year the water was purchased and the succeeding year. Table 4, page 28, also shows those parties having a carryover of exchange water from the 1971-72 to the 1972-73 water year.

Transfers of  
Allowed Pumping Allocations

The Central Basin Exchange Pool is not the only method of obtaining additional pumping rights. Each water year, there are a number of water right lease and sale transactions between parties. Table 10 lists leases, sales, parties, and amounts involved. Appendix A also records all sales of water rights between parties and shows the current ownership of Allowed Pumping Allocations by each of the parties as of September 30, 1972.

Suggested samples of water right lease and sale agreements are illustrated in Figure 7. The Watermaster recommends that all documents be prepared on an 8-1/2 x 11-inch sheet of paper. Any necessary additions to the recommended agreement may be attached to another page. You need not use these sample documents, but they are sufficient for most purposes.

The "General Information, Policies and Procedures" of the Watermaster Service in the Central Basin has been revised to read as follows:

*"In order that a water right lease be in force (applicable) during a particular water year, it must have been executed by the parties involved before or prior to September 1 of the water year in question. In addition the executed water right lease document must be filed with the Watermaster no later than August 31 or postmarked August 31 of the year in question. Any otherwise valid agreement not filed with the Watermaster prior to September 1 of the water year in question will be void and of no force or effect for the transfer of water rights."*

When property, on which water rights have been developed is sold, the Watermaster must be furnished a copy of the sale document. The sale docu-

ment is required for the proper accounting of the water rights. The Water-master assumes that the water rights pass on to the new owner unless specifically reserved in the sale document.

In leasing, buying, or selling water rights, parties should be specific as to the type being exchanged; i.e., Total Water Right or Allowed Pumping

Allocation. All leases should be entered into on the basis of Allowed Pumping Allocation, whereas sales should specify both amount of Total Water Right and amount of Allowed Pumping Allocation, each to the nearest whole acre-foot. All water right leases should be made on a water year basis; i.e., October 1 through September 30 of the following year.

### Overextractions

Each year some parties extract more ground water from the Central Basin than they are entitled to. The overextractions are usually small, within the tolerance set by the Judgment. Each party may overextract by 2 acre-feet or 10 percent of its Allowed Pumping Allocation, whichever is greater, on the premise that the overextraction will be eliminated during the following water year. Any overextractions above this limit must have prior approval by the Watermaster. Most overextractions are the result of an unexpected increase in water demand so it would be unreasonable not to allow some deviation from the limits and guidelines of the Judgment. Table 11 summarizes all overextractions during the 1971-72 water year.

Of the sixty-nine parties listed: twenty-four overextracted in violation of the Judgment, of which twenty-two have taken steps to eliminate their overextractions; ten had requested permission and obtained approval to overextract; and ten were also in violation at the end of the 1970-71 water year. Lakewood Pipe Company and Richland Farms Water Company, have not taken steps to eliminate their overextractions.

Lakewood Pipe Company is overextracted as a result of adjustments made to their reported meter readings found to be in error upon receipt of their production report for the July-August-September 1972 quarter.

Richland Farms Water Company has been in violation of the Judgment for the past three water years. On November 11, 1971, they asked for and were given approval to make up their overextractions, one-half during 1971-72 and the remainder during 1972-73. Instead of reducing their deficit by 65 acre-feet they increased it by an additional 125 acre-feet.

Ten parties also overextracted pursuant to an Ex Parte Order which is explained in this chapter.

The Watermaster recommends that no action be brought against those parties that overextracted but have taken steps to eliminate the overextractions.

### Findings and Determinations by Watermaster

WITH RESPECT TO EACH PARTY LISTED ON TABLE 11 CONTAINED IN THIS PORTION OF THE REPORT ON "OVEREXTRACTIONS", THE AMOUNT SHOWN IN COLUMN 6 CONSTITUTES THE QUANTITY OF WATER IN ACRE-Feet BY WHICH THAT PARTY HAS OVEREXTRACTED GROUND WATER FROM THE CENTRAL BASIN IN EXCESS OF THE QUANTITIES PERMITTED TO IT UNDER AND PURSUANT TO THE JUDGMENT IN THE CENTRAL AND WEST BASIN WATER REPLENISHMENT DISTRICT, PLAINTIFF, VS. CHARLES ADAMS, ET AL. DEFENDANT, CASE NO. 786,656, LOS ANGELES SUPERIOR COURT. EACH SUCH PARTY'S ALLOWED PUMPING ALLOCATION FOR THE WATER YEAR 1972-73, AS SHOWN IN APPENDIX A OF THIS REPORT, IS REDUCED BY SAID QUANTITIES SHOWN IN COLUMN 6, PURSUANT TO THE PROVISIONS OF PART III, SUBPART B, PARAGRAPH 3 OF THE JUDGMENT, EXCEPT INsofar AS THAT PARTY HAS ORDERED AND HAS BEEN ALLOCATED EXCHANGE POOL WATER FOR THE WATER YEAR 1972-73. THE FOREGOING STATEMENTS CONTAINED IN THIS PARAGRAPH CONSTITUTE A DETERMINATION AND FINDING BY THE WATERMASTER PURSUANT TO THE PROVISIONS OF PART II OF SAID JUDGMENT

From time to time the Watermaster evaluates historical ground water production records of parties at the request of the parties or at the Watermaster's discretion. In some instances, the evaluations and findings result in minor uncontested changes in the records to the benefit of the party or vice versa.

The administration of the Judgment was hampered to a degree by the failure of a number of parties in submitting

a/ Computed as 2 acre-feet or 10 percent of Allowed Pumping Allocation (Column 1), whichever is larger.

b/ Adjusted by the Watermaster of possible overextractions.

c/ Party did not request permission to exceed permissible overextraction and is in violation of the Judgment.

d/ However, it has taken steps to eliminate its overextraction.

e/ Permissible overextraction computed pursuant to old procedure.

f/ Permission to exceed permissible overextraction requested of and approved by the Watermaster. Party has

taken steps to eliminate its overextraction.

g/ Permission to overextract granted pursuant to Ex Parte Order.

h/ No permission to overextract by this amount is 1970-71 requested of or approved by Watermaster. Party

was in violation of Judgment.

i/ No permission to overextract requested of or approved by Watermaster. Party in violation of Judgment.

j/ See Footnote (a) in Table I.

k/ Two-year period for liquidation of 1970-71 overextraction of 131.79 acre-feet (65.89 acre-feet in 1971-72

and 65.90 acre-feet in 1972-73) requested of and approved by Watermaster. However, party continues to

be in violation.

their production reports to the Central and West Basin Water Replenishment District by the prescribed date. The "General Information Policies and Procedures" bulletin, published by the Watermaster and mailed to all the parties, sets the deadline as the 15th of the month for the water pumped during the preceding month.

#### Carryover of Allowed Pumping Allocation

A minor revision in our policy was made with regard to computing the allowable carryover of unused water rights. The provision in the Judgment (Subpart A, Part III) relative to allowable Carryover of unused water right states in part: "Each party ... who ... does not extract ... total quantity ... party's Allowed Pumping Allocation for the particular water year ... is

permitted to carry over from such water year the right to extract from the Central Basin in the next succeeding water year so much of said total quantity as it did not extract ..., not to exceed 10% of such party's Allowed Pumping Allocation, or 10 acre-feet, whichever ... is larger."

Previously, the allowable carryover had been computed based on 10% of combined Allowed Pumping Allocation (APA) and leases. Commencing with the water year 1971-72, a new rule was implemented whereby the leases are not considered in determining the 10% allowable carryover. However, the old rule has also been used during 1971-72 water year in order to give the parties the benefit of either rule during the period of transition. Shown below is an example of both rules.

#### Computation of Carryover, in Acre-Feet

	<u>Old rule</u>		<u>New rule</u>	
	<u>Lessor</u>	<u>Lessee</u>	<u>Lessor</u>	<u>Lessee</u>
APA	+ 500.00	+ 300.00	+ 500.00	+ 300.00
Carryover	+ 50.00	+ 10.00	+ 50.00	+ 10.00
Lease	- 100.00	+ 100.00	- 100.00	+ 100.00
Extraction	- 200.00	- 200.00	- 200.00	- 200.00
Year-end				
Balance	+ 250.00	+ 210.00	+ 250.00	+ 210.00
Carryover	+ 40.00 <sup>a/</sup>	+ 40.00 <sup>b/</sup>	+ 50.00 <sup>c/</sup>	+ 30.00 <sup>d/</sup>

Maximum allowable carryover of year-end balance:

a/ Equal to 10% (500 APA - 100 lease)

b/ Equal to 10% (300 APA + 100 lease)

c/ Equal to 10% (500 APA)

d/ Equal to 10% (300 APA)

Ex Parte Order Permitting  
Overextractions in Water  
Years 1971-72 and 1972-73

By letter dated July 5, 1972, the Metropolitan Water District of Southern California informed all its water purveyors of an unusually high demand for supplemental water from its distribution system due to lack of rainfall in Southern California. Because of this higher water demand, the quantity of water in storage at Lake Mathews was at an all time low. Should there have been a sudden outage of its system, MWD would not have been able to deliver water to any of its member agencies. As a result, MWD requested its member agencies having pumping rights in ground water basins to increase their ground water extractions during the summer and fall of 1972 in order to curtail the heavy demand on its water supplies.

In view of this emergency, the Central Basin Municipal Water District issued a letter informing its member agencies of the situation and put into motion a request from its attorney to obtain an Ex Parte Order from the Court authorizing overextractions beyond the 10% limit imposed by the Judgment, during the remainder of the water year 1971-72 and during the water year 1972-73. The order was signed by Judge John J. Shea on July 20, 1972 (see Exhibit D-1).

In essence, the Ex Parte Order permitted entities having connections to the facilities of MWD and its member agencies to overextract by an amount approved by the Watermaster in the years 1971-72 and 1972-73. In order to implement the Order, the Watermaster, in turn, transmitted forms on August 7, 1972 to all parties concerned. The forms were used to submit each parties'

intentions as to overextractions in the two water years. In addition, the form was to supply information as to the years and quantities of makeup for the overextraction which was required by the Ex Parte Order.

Twenty-nine parties were eligible to participate in the Central Basin program. Of the twenty-nine parties eligible to participate, 14, namely:

California-American Water Company  
California Water Service Company  
Compton, City of  
Huntington Park, City of  
Lakewood, City of  
Long Beach, City of  
Los Angeles County-Rancho Los Amigos  
Maywood Mutual Water Company No. 1  
Maywood Mutual Water Company No. 2  
Paramount County Water District  
South Gate, City of  
Southern California Water Company  
Southwest Water Company  
Vernon, City of;

filed an intent to voluntarily overextract. See Exhibit D-2 for quantities and years of overextraction and makeup.

By letter dated September 12, 1972, MWD informed all its member agencies that the crisis was over and that they could resume their normal operations. In view of this new development, the Watermaster informed all parties on September 29, 1972, that permission to overextract in 1972-73 had been rescinded and that overextractions approved for the water year 1971-72 and makeup thereof beyond the water year 1971-72 would still remain in effect.

An "Order Terminating Ex Parte Order Made July 20, 1972" was signed by Judge Shea on October 17, 1972. (See Exhibit D-3). The new order revoked all Allowable Overextraction in 1972-73 but affirmed permissible overextraction in 1971-72 and makeup thereof.

## V. ADMINISTRATIVE COSTS

The Central Basin Area was established as a "Watermaster Service Area" in accordance with Part 4, Division 2, of the Water Code of the State of California. Therefore, as provided under Section 4201, the cost of administering the service area and the distribution of water therein is payable one-half by the State and one-half by the parties.

### Cost of Watermaster Service for 1971-72

The Judgment requires that the Watermaster prepare and mail a copy of the tentative budget to each of the parties at least 60 days before the beginning of each water year. If no objections are received within 15 days after service of the tentative budget, it becomes a final budget.

The tentative budget submitted to the parties on July 30, 1971, is presented

in Table 12. There were no objections and it was adopted as the final budget on August 15, 1971.

The administrative cost chargeable to the parties was apportioned among the parties as directed by the Judgment. The Judgment provides that if the portion of the final budget payable by the parties is equal to, or less than \$5 per party, the cost shall be equally apportioned among the parties. However, if the parties' share of the budget is greater than \$5 per party, each party will be assessed a minimum of \$5 and the total amount so collected will be deducted from the parties' share of the budget. The remaining balance to be collected is then assessed among the parties in proportion to their Allowed Pumping Allocation which is in excess of 65 acre-feet.

TABLE 12. APPROVED BUDGET FOR 1971-72

Salaries and wages	\$50,839
Operating expenses	<u>21,949</u>
<b>TOTAL BUDGET</b>	<b>\$72,788</b>
 One-half payable by State	 \$36,394
One-half payable by parties	\$36,394
Less estimated carryover from 1970-71	<u>0</u>
<b>TOTAL AMOUNT BILLED</b>	<b>\$36,394</b>

Apportionments of parties' share of the budget for the water year 1971-72 are set forth in Table 13. A five percent penalty is assessed if payments become delinquent. In this respect, 32 parties were penalized as their payments were not made within the allowable 30 days after service of the statement of the amount due. Assessments totaling \$31.43 were collected for delayed payments.

Chapter IV presents information on Exchange Pool water carryover. This provision directs the Watermaster to bill and collect from those parties having a carryover of Exchange Pool water the difference in price per acre-foot (\$4) for exchange water when the price in the succeeding water year (\$47) exceeds the price of the previous year (\$43). A total of \$2,236.60 was collected for exchange water carried over from the

1970-71 water year to the 1971-72 water year. See Table 9 (page 37) for a detailed breakdown. These additional payments are considered miscellaneous income to the Watermaster and are applied towards that share of the Watermaster's budget to be paid by the parties.

In addition to the above-mentioned receipts, \$254.10 was collected for delayed payments in the operation of the Exchange Pool. The penalties were assessed in accordance with Exchange Pool procedures and the additional miscellaneous income thus collected was applied towards the parties' share of the budget.

Income and expenditures for watermaster service during the 1971-72 water year are shown in Table 14 below. Any credit or debit balance is carried forward into the succeeding water year.

TABLE 14. STATEMENT OF 1971-72 INCOME AND EXPENDITURES

Item	Parties	State	Parties and State
<u>Income</u>			
From 1971-72 budget	\$36,394.00	\$36,394.00	\$72,788.00

TABLE 13. APPORTIONMENT OF PARTIES' SHARE OF 1971-72 BUDGET (continued)

Party	Allocated Pumping Allocation, in acre-feet	Apportionment of parties' share of budget	Party	Allocated Pumping Allocation, in acre-feet	Apportionment of parties' share of budget
Van Ruiten, Pete & Mary	0	0.00	Whittier, City of	621	\$ 98.42
Veenendaal, Trent and Gertrude	14	5.00	Whittier Union High School District	100	10.00
Velasco, Salvador	13	5.00	Vierema, Mary and Pearl	13	5.00
Verhoeven, John C. and Sadie	20	5.00	Vierema, William and Elma	1	5.00
Vermas, City of	1,200	1,200.00	Wolfberger, Helen and Christine Joseph	2	5.00
Vierma, Joseph C. and Caroline	1	5.00	Yamamoto, George and Alice	14	5.00
Virginia Country Club of Long Beach	272	35.76	Yonke, Paul H. and Wyo	4	5.00
Vissar, Louis	7	5.00	Zellars, Arnold and Nellie	5	5.00
Vissar Brothers	10	5.00	Zuidervort, Dick and Janne	1	5.00
Viste Hill Psychiatric Foundation	31	5.00			
Walnut Creek Canoning Company	1	5.00			
Walnut Park Mutual Water Company	996	161.43	Total	217,367	\$ 30,399.00
Wales, Morris and Bessie	6	5.00			
Wells, Richard A. et al.	2	5.00			
Westport-Corriton Company	10	5.00			

a/ Delayed payment, penalty assessed. A total of \$31.43 was collected in penalties.

b/ Was a party at the time of billing.

c/ Not assessed because of nonutilization of water right within two successive water years prior to setting the 1971-72 tentative budget. See subparagraph (e) of the Judgment.

EX PARTE ORDER

CENTRAL & WEST BASIN WATER REFPLENISHMENT DISTRICT, etc.,	)	NO. 786 656
Plaintiff,	)	
-vs-	)	MOTION FOR AND EX PARTE
CHARLES E. ADAMS, et al.,	)	ORDER PURSUANT TO JUDGMENT
Defendants.	)	TO PERMIT ADDITIONAL OVER-
	)	EXTRACTIONS

Plaintiff, CENTRAL & WEST BASIN WATER REPLENISHMENT DISTRICT, hereby moves the Court for an ex parte order pursuant to Part IV of the Judgment in the above-entitled action and specifically sub-paragraph (e) at pages 60-61 thereof, and that certain paragraph appearing at lines 11-16 on page 61 thereof. The requested ex parte order is as follows:

"The Watermaster may permit any party, including a successor in interest of any party, having a connection whereby that party may obtain delivery of Metropolitan Water District's imported water into its distribution system, to over-extract such amount in excess of its Allowed Pumping Allocation for and during the current and ensuing water year in such amounts as the Watermaster may determine, and any such party's Allowed Pumping Allocation shall be reduced in the water years 1973-74 and 1974-75 by one-half (1/2) of the amount of such over-extractions in each such year, provided that the party at its own discretion may make up such over-extractions on a more accelerated basis, in which event the Watermaster shall adjust the party's Allowed Pumping Allocation for the applicable years in accordance with the actual make-up of such over-extractions. Attorneys for Plaintiff are directed, pursuant to the provisions of the Judgment, contained on page 61, to notice a motion for review of this ex parte order, upon which at least thirty (30) days notice shall be given. Such noticed motion shall be served no later than August 15, 1972. No compensation or other adjustment between or among the parties is indicated."

This motion is based on the referenced provisions of the Judgment, and upon the declarations of Carl Fossette and Martin E. Whelan, Jr. attached hereto, and upon the declaration of Paul R. Singer filed concurrently herewith.  
DATED: July 18, 1972

MARTIN E. WHELAN, JR., INC.

By Martin E. Whelan, Jr.  
Attorneys for Plaintiff

Pursuant to the within motion, and pursuant to Part IV of the Judgment in the above action and specifically subparagraph (e) at pages 60-61 thereof, and that certain paragraph appearing at lines 11-16 on page 61 thereof, the Court orders as follows:

The Watermaster may permit any party, including a successor in interest of any party, having a connection whereby that party may obtain delivery of Metropolitan Water District's imported water into its distribution system, to over-extract such amount in excess of its Allowed Pumping Allocation for and during the current and ensuing water year in such amounts as the Watermaster may determine, and any such party's Allowed Pumping Allocation shall be reduced in the water years 1973-74 and 1974-75 by one-half (1/2) of the amount of such over-extractions in each such year, provided that the party at its own discretion may make up such over-extractions on a more accelerated basis, in which event the Watermaster shall adjust the party's Allowed Pumping Allocation for the applicable years in accordance with the actual make-up of such over-extractions. Attorneys for Plaintiff are directed, pursuant to the provisions of the Judgment, contained on page 61, to notice a motion for review of this ex parte order, upon which at least thirty (30) days notice shall be given. Such noticed motion shall be served no later than August 15, 1972. No compensation or other adjustment between or among the parties is indicated.

DATED: July 20, 1972

John Shea, Judge

Administration of  
Ex Parte Order, Pursuant to Judgment,  
To Permit Overextractions for  
the Water Years 1971-72 and 1972-73

 CHARLES E. ADAMS, et al.,  
 Defendant.

NO. 786656

ORDER TERMINATING EX PARTE  
 ORDER MADE JULY 20, 1972

WHEREAS:

1. On July 20, 1972, the Court made its Ex Parte Order in the above matter permitting certain overextractions upon approval by the Watermaster, based upon an emergency in existence at that time;

2. Pursuant to the judgment in the above entitled matter, a review of said Ex Parte Order was noticed for hearing before the Honorable John A. Shea, in Department 47 of the above entitled court, at the hour of 10 o'clock a.m., on September 11, 1972, and was thereupon transferred to Department 36, at which time the matter was considered;

3. Plaintiff was represented by its attorneys Martin E. Whelan, Jr., Inc., by Martin E. Whelan, Jr., and various defendants were represented by attorneys as indicated by the court record;

4. A letter from Metropolitan Water District of Southern California to the effect that the emergency giving rise to the Ex Parte Order is now over was presented to the Court with concurrence of all parties present;

5. The Court having heard all the evidence and testimony heard and considered argument with regard to the Ex Parte Order

NOW, THEREFORE, it is ordered and decreed as follows:

A. The Ex Parte Order made July 20, 1972, is hereby terminated, effective September 30, 1972, the end of the 1971-72 Water Year.

B. The Watermaster shall not grant any further permission to overextract pursuant to said Ex Parte Order, except as heretofore approved by him prior to September 21, 1972.

C. Overextractions previously approved by the Watermaster with respect to the Water Year 1972 to 1973 shall be rescinded, and he shall forthwith advise the affected parties accordingly.

D. Any party who has overextracted pursuant to the Ex Parte Order during the Water Year 1971-72, based on Watermaster permission granted prior to September 21, 1972, shall have its Allowed Pumping Allocation reduced in each of the Water Years 1973-74 and 1974-75 by one-half (1/2) of the amount of such overextractions, provided that the party at its own discretion may make up such overextractions on a more accelerated basis, in which event the Watermaster shall adjust the party's Allowed Pumping Allocation for the applicable years in accordance with the actual make-up of such overextractions.

E. The original judgment in this case shall remain in full force and effect.

F. No party who has overextracted from the Central Basin pursuant to the July 20, 1972 Ex Parte Order shall acquire any additional rights by reason of such overextraction; nor shall any required reduction in extractions during any subsequent years reduce the total water right to any party to the extent said overextractions are in compliance with this order.

G. ~~Nothing in this order~~ <sup>as without prejudice to any claim of</sup> ~~shall be construed to~~ <sup>any party</sup> ~~give~~ right to compensation or other equitable adjustment should any or all overextractions pursuant to the Ex Parte Order cause any damage whatsoever to any such party.
